Infrastructure Facility

Laboratories | Equipment etc.

Dr. S M Patel Research and Characterization Laboratory (Lab No. 107)	**Materials Synthesis Laboratory (Lab No. 108)**
o Scanning Electron Microscope (SEM) (JEOL) o X-ray Diffractometer (XRD) (Beuker) o Thermogravimatric Analyzer/ Differential Scanning Calorimeter (TGA/DSC) (Mettler/Toledo) o Rheometer (Anton Paar) o Fourier Transform Infrared Spectrophotometer (FTIR) (Thermo Nicolet) o Particle Size Analyzer (Malvern)	o Dip-/Spin Coater (Apex) o Film Applicator o Rotaevaporator (Heidolf) o Muffle furnace (DK Sci) o Drying / Vacuum oven(DK Sci) o Melting point measurement set-up o Water Bath (DK Sci) o Fume hood
Instrumentation and Measurement Laboratory (Lab No. 106)	**Materials Inkjet Printing Laboratory (Sophisticated Instrumentation Laboratory) (Lab No. 116)**
o Low temperature measurement set-up for conductivity and photoconductivity (Jenis) o Source/Meter (Keithley) o Digital Multimeter (Keithley) o Flash evaporation system (Mansha Vacuum) o Sputtering Unit (Hind-high Vac)	o Materials Inkjet Printer (DMP2831, Fujifilm, USA) o Microviscometer (Lovis 2000M, Anton Paar) o Split tube furnace (Ants lab, Ants Ceramics Pvt Ltd) o Vacuum Oven (Ants lab, Ants Ceramics Pvt Ltd)
